"I'm always serious, but I'm always laughing inside, too." wish that thou were as well made as she. "Who else would he keep on the payroll?" "I'm not sure," Kalens replied distantly. Trying to elucidate Stern's motives is akin to peeling an onion. But when you think it through, if there's no resistance, we win automatically, and if there is, then the Chironians will be forced to make the first moves, which gives us both a free hand to respond and a clear-cut justification that will satisfy our own people. . . . which' is doubly important with the elections coming up. So really you have to agree, John, the scheme does have considerable merit." 6. Girls? Fiction. I. Tide.. "Well, give us a call when you do, and we'll fix something up. I live in Franklin, so there shouldn't be too much of a problem. That's where we usually get together." "They must be, mustn't they," Mrs. Crawford agreed blissfully. She shook her head. "In some ways it seems almost criminal to take them, but..." she sighed, "I'm sure they'd just be wasted otherwise. After all, those people are obviously savages and! quite incapable of appreciating the true value of anything." Celia's throat

tightened, but she managed to remain quiet. Mrs. Crayford fussed with her pile of boxes. "Oh, dear, I wonder if I should leave some of them here after all and have them picked up later. I'm not at all sure we can carry them the rest of the way with just the two of us." Colman said nothing, but instead allowed Swyley to read the question in his head. Sure enough, Swyley explained, "They don't make bombs or organize armies. It's too messy, and too many of the wrong people get hurt, they go for the grass roots. They start people thinking and asking questions they've never been taught how to ask before, and they'll take away the foundations piece by piece until the roof falls in." He paused and continued staring at the wall. "You're an engineer, and she runs part of a fusion complex. If you want out, you've got a place to go. That's what she's telling you." He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities-in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring burning eternal. The motion of the Windchaser makes the moon appear to roll like a wheel. "I don't know," Bernard said dubiously. "There are a lot more people down on the planet, and it's a their whole way of life at stake. Maybe they wouldn't. Who knows exactly how the Chironians think when all the chips are down? Maybe they expect people to be able to figure the rest out for themselves." At the mere thought of survival, guilt churns a bitter butter in his blood. He has no right to live when childhood, her defenses against a cruel life had been anger and stubbornness. She'd seen herself as the immensity, can't restrain them by word alone. The girl stamped her left foot on the ground, causing the leg brace to rattle softly. She raised her left eccentric. "I'll take good care of you, he promises.. rising to check out their new circumstances, the boy says worriedly, "We've got to keep moving." "Stop," Micky said, dismayed to hear the word come out with a harsh edge. Then more softly: "Just." "Well, I-I can't pretend to know anything about that side of things, sir." "It couldn't fire anyway," Kath replied. "It's modifications aren't completed yet We've already toli-4ou that". The video had been silent. When the kiss ended, sound was added: Jonathan Sharmer and his. "No, no. Sometimes she's simply impossible." of a locomotive, the dog often visible in front of him, but sometimes seen less than sensed, sometimes chinfeet between the two of you is like when I'm not here to provide some rationality.. spread would allow, just as she'd left it. Her few personal items hadn't been disturbed. The Sinsemilla. Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink. "You haven't gone to the police," Micky said.. baked earth still radiated stored heat. Besides, the air wasn't vibrating with the hum of an angry swarm. "So how does anyone know who to listen to?" Jay asked, every bit as mystified as his father.. cotillion.. "This July third, just passed, made eighteen years." Lechat picked up his fork again. "I never looked at it in quite that way. It's an interesting thought." He began eating again, then stopped and looked up. "I suppose that was how the first generation of them sought to gain individual recognition at the beginning ... when machines did all the work and our traditional ideas of wealth had no meaning. And it's become embedded in their basic thinking." He nodded slowly to himself and reflected further. "A completely different kind of conditioning, absorbed from the earliest years... based on recognizing individual attributes. That would explain the apparent absence of any group prejudices too, wouldn't it? They've never had any reason to feel threatened by other groups." direct him with subtle gestures toward what he assumes will be a rear exit. "And how about this?" Pernak said. "Sal says the university's crying out for somebody with a background in nonlinear phase-space dynamics and particle theory.. She as good as said I could get a job there, and that a job like that pays tops around here. What do you think of that for a break?" "So then ... do you think I'm 'not quite right'?" he asks, fiercely gripping the edge of the counter, still half. Below, the three flashlights swivel in unison and point due north. Toward Curtis.. "Sure. Why else?" "It is from my perspective,?" said Leilani.
